

Shanghai International Circuit Asphalt Race Track

This is a section of the Shanghai International Circuit. It is designed with advanced technology.

Overview

Shanghai International Circuit Asphalt Track

The Shanghai International Circuit represents a pinnacle of modern civil engineering, incorporating world-class asphalt racing technology. Designed to meet the rigorous standards of Formula 1, this track infrastructure features advanced soft foundation treatment methods. It has been recognized with prestigious accolades, including the Zhan Tianyou Civil Engineering Prize and the China Construction Engineering Science and Technology Progress Prize.

Technical Achievements

Awards & Recognition

- Zhan Tianyou Civil Engineering Prize
- China Construction Engineering Science and Technology Progress Prize
- China Construction Industry Association Technical Innovation Achievement (Second Prize)

Construction Methodology

Soft Foundation Treatment, Advanced Civil Engineering, High-Performance Asphalt
