

Shank Adapter for Drilling Equipment

This shank adapter provides a secure link between drilling tools and equipment. Its robust build and precise engineering ensure dependable performance in challenging drilling environments.

Overview

High-Performance Shank Adapter

This shank adapter is a critical component designed for efficient power transmission between the drilling machine and the drill stems. Engineered for durability and precision, it ensures reliable connectivity to maximize rock cutting performance. It serves as an essential link in threaded drilling systems, facilitating seamless operation in demanding drilling environments.

Technical Specifications

Monthly Production Capacity

2000 pcs/month

Production Output

Available Thread Sizes

R28, R32, R38, T38, T45, T51

Logistics

Packaging Methods

- Wooden case
- Bundles
