

Shank Hook Lifting Attachment

Shank hooks are lifting accessories with a shank for secure attachment. They are available in self-colored or zinc-plated finishes for corrosion resistance and feature a safety latch.

Product Overview

Professional Shank Hook Lifting Attachment

This shank hook is a robust lifting accessory engineered for high-performance in demanding industrial environments. Featuring a secure shank for reliable attachment to lifting mechanisms, it is built for maximum strength and safety. Each unit is equipped with an integrated safety latch to prevent accidental load disengagement, making it an essential component for construction, manufacturing, and material handling tasks.

Technical Specifications

Rated Capacity

5000 kg

Maximum Load

Safety Features

- Safety latch included
- Engineered for high-strength durability
- Corrosion-resistant finish options

Surface Finishes

Self-colored, Zinc-plated

Applications

Suitable Industries

Construction • Manufacturing • Material Handling
