

Sharp Edge Tester for Safety Compliance

This sharp edge tester adheres to the UL1439 standard. It is designed to evaluate the sharpness of edges on electrical equipment, toys, and household appliances to identify potential safety hazards.

Product Overview

Safety Compliance Testing

This sharp edge tester is a specialized safety equipment designed to evaluate products for potentially harmful sharp edges. Built according to the UL1439 standard, it ensures that electrical equipment, toys, and household appliances meet rigorous safety requirements to protect end-users from injury. Its durable construction and precise design make it an essential tool for quality control and product development.

Technical Specifications

Compliance Standard

UL-1439

Included Accessories

- Two boxes of standard testing heads

Dimensions

184 x 35 x 52 mm

Weight

132 g

Application

Target Equipment

Electrical Equipment, Toys, Computers, Home Electrical Equipment
