

Shearer Crawler Link for Mining Machinery

This crawler link is designed for longwall mining machines. It provides reliable traction and mobility for heavy equipment in harsh underground environments.

Product Overview

Heavy-Duty Crawler Link

These heavy-duty crawler chain links are precision-engineered for shearer machinery and continuous mining applications. Constructed from high-strength, wear-resistant materials, they are designed to withstand the harsh, abrasive environments of underground mining. The robust, interlocking design ensures reliable power transmission and optimal traction, promoting efficient and smooth operation of heavy mining equipment.

Technical Specifications

Weight Range

0.5 kg

Minimum Weight

100 kg

Maximum Weight

Compatible Machinery

Continuous Miner, Scraper

Design & Construction

Key Features

- Reinforced construction for enhanced durability
- Wear-resistant surface treatment
- Interlocking design for secure connection
- Precision-engineered for optimal fit
