

Shearer Flight Bar for Longwall Mining

This flight bar is specifically designed for use in longwall mining machines. It facilitates the efficient movement of materials within the shearer during continuous mining operations.

Product Overview

Shearer Flight Bar for Longwall Mining

These heavy-duty flight bars are precision-engineered for shearer applications in demanding underground mining environments. Designed for continuous operation, they feature a robust construction that ensures efficient material conveyance and optimal loading performance. Each unit is finished with a protective coating to resist corrosion and wear, significantly extending service life and reducing operational downtime.

Technical Specifications

Weight Range

0.5 kg

Minimum Weight

100 kg

Maximum Weight

Component Type	Flight Bar
Compatible Machinery	Longwall Mining Machine

Features

Key Features

- High-strength material composition
- Multiple mounting holes for secure attachment
- Corrosion and wear-resistant protective coating
- Optimized profile for cutting and loading
