

Sheep Feed Pellet Production Line

This sheep feed pellet production line efficiently processes raw materials into nutritionally balanced feed. The system integrates grinding, mixing, pelletizing, cooling, and packaging to ensure consistent feed quality.

Overview

HEXIE

HEXIE

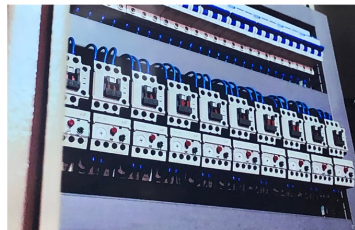

Complete Sheep Feed Production Solution

This fully automatic feed fermentation production line integrates dosing, crushing, mixing, and microbial strain control into a single seamless process. Managed by a PLC control system, it ensures high-volume, high-quality pellet production with minimal labor requirements. The system is designed for livestock farms seeking a turnkey solution for producing nutritionally balanced and palatable feed for sheep and other livestock.

Technical Specifications

HEXIE

Condition

New

Model Information

Sheep Feed Production Line

Equipment Type

Forage Equipment

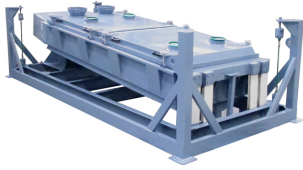

Control System

PLC Automatic Control

Production Process

 **HEXIE**

Rotary screen

 **HEXIE**

Packing machine

Integrated Processes

- Raw materials receiving and cleaning
- Crushing process
- Mixing process
- Pellet making process
- Pellet cooling process
- Pellet crumbling process
- Sifting process
- Packaging process

Key Components

 **HEXIE**

Hammer Mill

 **HEXIE**

Mixer

 **HEXIE**

Pellet Mill

 **HEXIE**

Crusher

Included Machinery

Cylinder filtering sieve, Hammer mill, Mixer, Feed pellet machine, Counter flow cooler, Crumbler machine, Rotary screener, Packing machine

System Capabilities

 **HEXIE**

Cooler

Mixing Performance

High-quality blending defined by low co-efficient of variation for micro ingredients.

Cooling & Storage Life

Counter flow cooling removes heat and moisture to prevent fungus and extend storage life.

Crumbling Mechanism

Includes by-pass mechanism to break pellets for small chicks/hens or pass through directly.

Compliance & Logistics

Certifications	ISO9001, CE, SGS
Export Packaging	Standard Export Wooden Case
Available Ports	Guangzhou, Qingdao, Shanghai

Service Scope

Turnkey Project Services

- Consultation Service
- System Design
- Civil Engineering
- Manufacturing
- Installation
- Operational Training
