

Sheet Metal Bending Brake

This sheet metal bending brake is designed to bend sheet metal into various shapes. It features manual operating levers and wheels for precision bending in manufacturing and fabrication settings.

Product Overview

Professional Sheet Metal Bending Brake

This manual sheet metal bending brake is engineered for precision fabrication and manufacturing environments. Featuring a robust construction with an integrated clamping system and clear measurement guides, it allows for accurate bending of metal sheets into complex geometries. The machine is designed for durability and ease of operation, making it an essential tool for workshop and industrial applications.

Physical Attributes

Country of Origin

Made in China

Design Features

Robust Steel Frame, Manual Lever Operation, Integrated Clamping Bar, Precise Measurement Markings
