

Sheet Metal Cutting and Folding Machine

This machine is engineered for both cutting and folding sheet metal. It delivers precise and efficient performance in diverse metalworking applications.

Product Overview

Advanced Multimedia & Navigation System

This comprehensive car multimedia and navigation system is designed to elevate the driving experience through seamless integration and high-performance features. It offers robust connectivity options including USB media playback, Bluetooth hands-free calling, and high-sensitivity AM/FM radio reception. With intuitive touchscreen controls, voice-guided navigation, and support for reverse camera integration, this system ensures both entertainment and safety on the road.

Core Features

Key Features

GPS Navigation, Bluetooth Hands-free, Touchscreen Interface, Reverse Camera Support, Steering Wheel Control, USB Media Playback

Media & Connectivity

Supported Media Formats

- MP3
- MPEG4
- WMA
- JPEG

Radio & Tuner

Radio Receiver

36 stations

Preset Stations

System Capabilities

System Functions

Feature Category	Capability
Navigation	Voice prompts & Handwriting input
Audio	Individual speaker control (Front/Rear/Left/Right)
Display	Color touchscreen with auto-light sensing
Integration	Steering wheel control & Reverse camera
