

Sheet Metal Cutting Snips

These aviation snips are designed for cutting sheet metal. They feature a compound lever mechanism for increased cutting power and durable alloy steel blades for long-lasting performance.

Product Overview

Heavy Duty Sheet Metal Snips

These heavy-duty snips are designed for precision cutting of sheet metal. Featuring a robust carbon steel construction and a double-layer handle, they offer both durability and comfort for professional use. The 10-inch size and right-cut orientation make them a versatile tool for various metalworking applications.
