

Sheet Metal Snips

These tin snips are designed for cutting sheet metal with efficiency. They feature durable steel blades and comfortable grips, making them suitable for HVAC, roofing, and general metalworking.

Product Overview

Heavy-Duty Sheet Metal Snips

These professional-grade tin snips are engineered for precision and durability in demanding metalworking environments. Featuring hot, drop-forged steel blades, they offer exceptional strength for cutting cold-roll and stainless steel. The integrated spring washer design maintains tight blade alignment, ensuring consistent cutting quality and reduced hand fatigue during extended use.

Cutting Performance

Cold-Roll Steel Capacity	20 gauge
Stainless Steel Capacity	22 gauge

Physical Dimensions

Available Lengths

- 10 inches
- 12 inches

Construction & Quality

Blade Material	Hot, drop-forged steel
Key Features	Precision-ground edges, Spring washer mechanism, Straight and wide curve cutting, High-leverage design
