

# Shielded Audio Cable for Speakers and Sound Boxes

This high-quality audio cable is designed for optimal signal transmission. It features shielded construction to minimize interference and precision-engineered connectors for secure connections with speakers, sound boxes, and other audio equipment.

## Product Overview

### Professional Grade Shielded Audio Solution

This high-quality audio cable is engineered for superior signal transmission, making it an ideal choice for professional and home sound setups. Featuring a robust shielded construction, it effectively minimizes electromagnetic interference to deliver clear, uninterrupted audio. The durable outer jacket ensures longevity, while the precision-engineered connectors provide a secure and reliable link for speakers and sound boxes.

## Technical Specifications

### Recommended Applications

- Professional audio equipment
- Sound boxes
- Speakers
- General audio setups

<b>Cable Type</b>	1394 Audio Cable
<b>Construction Features</b>	Shielded, High-durability jacket, Precision connectors
