

Shielded Cable with Internal Conductors

This shielded cable features internal conductors. It is designed for electrical or data transmission purposes.

Product Overview

High-Performance Shielded Cable

This shielded cable is engineered for reliable electrical and data transmission applications. Featuring a robust grey outer jacket, the cable houses two internal conductors designed for secure connectivity. The internal conductors are distinctively color-coded, facilitating easy identification during installation and maintenance.

Technical Specifications

Common Applications

- Electrical transmission
- Data transmission

Internal Conductors	2
Model Identifier	SC6801
Key Features	Shielded, Color-coded conductors, Grey outer jacket
