

Shielded Data Transmission Cable

This shielded cable is designed for reliable data transmission. It features a cylindrical black body with metallic fittings at both ends.

Product Overview

High-Performance Data Transmission

This shielded communication cable is engineered for reliable data transmission in demanding industrial environments. Featuring a robust cylindrical black design with secure metallic fittings, it ensures signal integrity and durability. The cable is equipped with specialized clamping mechanisms and metallic termination rings to provide superior protection against interference.

Technical Specifications

Suitability

Demanding Environments • Data Transmission

Design Type

Shielded Communication Cable

Construction Features

Shielded, Metallic Fittings, Clamped Termination, Metallic Rings

Body Color

Black
