

Shielded Twisted Pair Cable 15x20 AWG

This is a shielded twisted pair cable used for data or signal transmission. It consists of 15 twisted pairs of 20 AWG wires enclosed in a metallic shield.

Product Overview

High-Performance Shielded Twisted Pair Cable

This shielded twisted pair cable is engineered for reliable data and signal transmission in demanding environments. Featuring 15 twisted pairs of 20 AWG conductors, the design incorporates a metallic shield to effectively minimize electromagnetic interference (EMI). Its robust construction makes it an ideal solution for professional cabling requirements where signal integrity is paramount.

Technical Specifications

Shielding

Shielded

Conductor Gauge

20 AWG

Number of Pairs

15

Jacket Color

Gray

Model Marking

SYT+1 15X2XAWG20

Key Features

Design Advantages

- Twisted pair construction for crosstalk reduction
- Metallic shielding for EMI protection
- Standardized AWG sizing for compatibility
