

Shiplift Reduction Gearbox

This heavy-duty reduction gearbox is designed for shiplift applications. It features a robust construction with multiple access ports and inspection covers.

Product Overview

Heavy-Duty Shiplift Gearbox

This reduction gearbox is specifically engineered for high-torque shiplift applications in demanding marine environments. Designed for reliability and longevity, it features a robust construction capable of handling significant loads. The unit includes multiple access ports and inspection covers, ensuring ease of maintenance and operational safety during critical lifting procedures.

Technical Specifications

Key Features

- High torque capacity
- Robust construction
- Multiple access ports
- Integrated inspection covers

Primary Application	Shiplift Systems
Environment	Marine, Heavy-duty
