Product Overview

Professional Shock Spring Compressor

This heavy-duty shock spring compressor is engineered for the safe assembly and disassembly of Macpherson springs on both front and rear axles. Designed for professional workshop environments, it features a shielded screw body for maximum strength and safety during high-tension operations. The universal adjustable jaw system ensures compatibility with a vast range of vehicle makes and models, providing a reliable solution for suspension maintenance.

Technical Specifications

Maximum Clamp Force

2300 kgs

Max Clamp Force

Screw Body Length	450 mm
Jaw Operating Range	100-265 mm
Driver Size	24mm Hex
Key Features	Heavy Duty, Shielded Screw Body, Impact Gun Compatible, Anti-Slip Jaw Design

Vehicle Compatibility
