

Shoe Mould Engraving Machine

This high-precision engraving machine is designed for creating shoe moulds, suitable for various mould materials. It offers advanced control systems and robust construction for accurate and efficient mould production.

Overview

High-Precision Shoe Mould Engraving

This professional-grade engraving machine is engineered specifically for the intricate demands of shoe mould production. Featuring imported ball screws and circle orbits across all three axes, it ensures exceptional stability, high precision, and long-term operational reliability. Designed for compatibility with industry-standard CAD/CAM software, this machine offers consistent linear and curving speeds, making it an efficient solution for complex mould fabrication.

Technical Specifications

Axis Construction

- Imported ball screw
- Circle orbit
- Dustproof X-axis

Spindle System

Constant power rate metal engraving water-cooling spindle

Software & Compatibility

Supported CAD/CAM Software

Type3, Artcam, Castmate, Wentai

Operational Features

Process Forecasting

Yes

Compliance & Standards

Certifications

CE
