

Shower Water Softener with Digital Display

This compact water softener is designed for shower applications and features a user-friendly interface. The unit reduces water hardness, which improves water quality.

Product Overview

Compact Residential Water Softening

This residential water softener provides a compact and efficient solution for improving household water quality. Designed with automatic control and dynamic regeneration capabilities, it ensures reliable performance for various applications including showering, hair washing, and laundry. Its food-grade material construction prioritizes safety, while the flexible installation options allow it to be placed conveniently before or after your existing water heater.

Technical Details

Key Features
