

Shrink Wrapping Machine

This shrink wrapping machine uses POF, PVC, PE, and PP films to wrap products. It is suitable for packing bottles, cans, books, CDs, and hardware products.

Product Overview

Professional L-Type Shrink Wrapping System

This industrial shrink wrapping machine is engineered for versatile packaging of bottles, cans, books, CDs, and hardware products. It utilizes a high-performance L-bar sealing system with non-stick Teflon coating to ensure clean, smoke-free seals. Designed for efficiency, the machine features automated conveyor integration and is compatible with various shrink films including POF, PVC, PE, and PP.

Technical Specifications

Available Models

- BTL-450A
- DT-SL500

Key Performance Metrics

1200 packs/hour
Max Production Speed

6 kg/cm³
Air Pressure

Weight Specifications

Model Type	Weight
BTL-450A	125kg - 135kg
DT-SL500	220kg

Supported Shrink Films

POF, PVC, PE, PP

Operational Features

Safety and Protection

Hot Protection Device • Sticky Free Sealing Knife • Emergency Stop Capable

Automation Functions

- Automatic conveyor discharge
- Manual/Auto operation switch (BTL-450A)
- Adjustable conveyor height
- Double electromagnet pressure system
