

Side-by-Side Refrigerator with LED Display

This refrigerator features a spacious interior with adjustable shelves and door bins. Its frost-free operation prevents ice buildup, and it has temperature control settings and an energy-efficient design.

Product Overview

Professional Storage Solution

This high-capacity side-by-side refrigerator offers a total net volume of 560 liters, designed for optimal food preservation in professional settings. Featuring advanced frost-free technology and a 3D anti-bacteria system, it ensures hygiene while maintaining consistent freshness. The unit combines a sophisticated tempered glass mirror finish with intelligent computer-controlled temperature precision.

Performance Specifications

Total Net Volume	560 L
Freezer Volume	206 L
Rated Input Power	175 W
Energy Consumption	1.49 Kw.h/24h
Star Rating	3

Advanced Features

Sterilization Technologies	Ultraviolet, Ozone, Titanium Photocatalyst, Active Ion, Anion
Photosynthesis Freshness System	Yes

Design and Control

Interface	120-degree high-definition LED display
Exterior Material	Tempered glass mirror finish
Temperature Control Accuracy	1 degree
