

Side Eject Tines Set

This set includes four side eject tines designed for efficient material removal. Each tine has a side ejection port that directs debris away from the work area.

Product Overview

High-Performance Side Eject Tines

The Side Eject Tines Set is engineered for high-efficiency material removal in demanding industrial environments. Featuring a specialized side ejection port, these tines effectively divert debris away from the workspace to ensure consistent performance. Constructed from 40Cr alloy steel and subjected to rigorous heat treatment, they offer superior durability and resistance to wear for extended tool longevity.

Technical Specifications

Heat Treatment

50 HRC
Hardness

Material	40Cr
