Product Overview

Versatile Abrasive Solution

This silicon carbide abrasive cloth roll is engineered for high-performance material removal and precise surface preparation. Featuring a durable, flexible backing, it is designed to withstand rigorous sanding, grinding, and polishing tasks across multiple mediums. It provides consistent, reliable performance for both manual hand sanding and machine-assisted applications in professional industrial environments.

Technical Specifications

Application Method

- Hand Sanding
- Machine Sanding

Key Features

- Flexible backing for contours
- High material removal rate
- Long-lasting durability

Abrasive Grain

Silicon Carbide

Compatible Materials

Metal, Wood, Plastic

Industry Applications

Primary Industries

Automotive • Woodworking • Metalworking • Construction
