

Silicon Carbide Abrasive Cloth Roll

This silicon carbide abrasive cloth roll features X-weight cloth and double resin bonding. It is designed for rough sanding of wood and general belt applications.

Product Overview

High-Performance Abrasive Cloth

This silicon carbide abrasive cloth roll is engineered for versatile material removal across metal, wood, and plastic substrates. It features a durable, flexible backing that provides exceptional strength during both manual and machine sanding operations. Designed for efficiency, the sharp silicon carbide grains ensure consistent performance throughout the grinding and polishing process.
