Product Overview

High-Performance Abrasive Solution

This silicon carbide abrasive paper is engineered for superior cutting efficiency and durability. Utilizing advanced electro-coated technology on high-quality kraft paper, it delivers a consistent scratch pattern suitable for demanding professional applications. Its waterproof design ensures reliable performance in both wet and dry sanding environments, making it an essential tool for automotive, woodworking, and metalworking tasks.

Technical Specifications

Abrasive Material	Silicon Carbide
Backing Material	Kraft Paper
Coating Technology	Electro Coated
Bonding Agent	Synthetic Resin

Usage & Application

Target Industries

- Automotive
- Woodworking
- Metalworking
- Painted Surfaces

Sanding Methods	Wet Sanding, Dry Sanding
