

Silicon Carbide Abrasive Roll

Silicon carbide abrasive roll designed for sanding and finishing applications. Features a durable backing material for extended life and resistance to tearing.

Product Overview

Professional Abrasive Solution

This Silicon Carbide abrasive roll is engineered for demanding sanding and finishing applications across diverse materials. Featuring a highly durable backing material, it offers extended service life and superior resistance to tearing during intensive use. It is a versatile choice for workshops and industrial environments, supporting effective material removal and surface refinement on wood, metal, and plastics.

Technical Specifications

Key Features

- Durable backing material
- Tear-resistant design
- Extended product life
- Versatile application range

Sample Grit Specification

P40

Abrasive Material	Silicon Carbide
Available Grit Range	Coarse to Fine
Compatible Materials	Wood, Metal, Plastics
