

Silicon Carbide Coated Abrasive Disc

This coated abrasive disc features silicon carbide and a closed coat on an X-cloth backing. It is designed for high strength, low stretch, and use on wood, non-ferrous metal, and non-metal materials.

Product Overview

Silicon Carbide Coated Abrasive Disc

The TC133X is a high-performance coated abrasive designed for demanding material removal and finishing tasks. Featuring a durable silicon carbide grain bonded with a robust resin-over-resin system, it ensures consistent performance and longevity. This abrasive is built on an X-weight cotton backing, providing the stability required for efficient grinding, sanding, and polishing applications.

Technical Specifications

Product Code	TC133X
Abrasive Grain	Silicon Carbide (C)
Backing Material	X-weight Cotton
Bonding	Resin/Resin (R/R)

Performance Range

Grit Range	P36, P40, P60, P80, P100, P120, P150, P180, P220, P240, P280, P320, P360, P400
------------	--

Dimensions

Available Widths

- 1400mm
- 1650mm
