

Silicon Carbide Fiber Discs

These silicon carbide fiber discs are designed for heavy-duty grinding and finishing tasks. They feature a durable fiber backing and sharp silicon carbide abrasive grains, ensuring effective material removal.

Product Overview

High-Performance Silicon Carbide Fiber Discs

These premium silicon carbide fibre discs are engineered for heavy-duty grinding, blending, and finishing applications. Featuring a durable fibre backing and sharp abrasive grains, they provide aggressive material removal and consistent, long-lasting performance. They are versatile enough to handle a wide range of materials, including ferrous and non-ferrous metals, stone, glass, and composites.

Technical Specifications

Abrasive Material	Silicon Carbide
Backing Type	Fibre

Applications & Compatibility

Primary Applications

- Heavy-duty grinding
- Blending
- Finishing

Compatible Materials	Ferrous Metals, Non-ferrous Metals, Stone, Glass, Composites
----------------------	--

Key Features

Performance Highlights

1 Aggressive

Material Removal Rate

1 High

Durability
