

Silicon Carbide Grooving Sanding Disc

These sanding discs are made with silicon carbide and feature a paper matrix and resin mixture. They are designed for granite stone polishing, providing good chip removal and fast heat dissipation.

Product Overview

Silicon Carbide Grooving Sanding Disc

These abrasive sanding discs are engineered specifically for demanding grooving and surface preparation tasks. Featuring a durable silicon carbide composition, they are designed for efficient material removal in both metalworking and woodworking environments. The discs include a central cutout for secure attachment to standard power tools, ensuring stability and controlled abrasion during operation.

Technical Specifications

Diameter Options

- 115mm
- 125mm
- 150mm
- 180mm
- 230mm

Available Grits	16, 24, 36, 60, 80, 100, 120
Abrasive Material	Silicon Carbide
