

Silver Hopper Car for Bulk Transport

This freight car is specifically designed as a hopper for transporting bulk materials. The silver-colored exterior features vertical support beams, a side door, and is mounted on wheels and suspension.

Overview

Professional Bulk Transport Solution

The C80 model silver hopper car is engineered specifically for the high-capacity transport of bulk materials, such as coal. Featuring a robust design with vertical support beams and reinforced structural rivets, it offers exceptional durability for heavy-duty logistical operations. This specialized rail freight asset is optimized for efficiency and reliability in large-scale supply chain environments.

Technical Specifications

Model Designation	C80
Unit ID	437 3097
Primary Application	Bulk Transport, Coal Transportation, Heavy-Duty Rail
