

# Sinewave Uninterruptible Power Supply (UPS)

This sinewave UPS provides reliable power protection for sensitive electronic equipment. Featuring a pure sinewave output, it ensures compatibility with a wide range of devices, including computers, servers, and networking equipment.

## Overview

### Professional Power Protection

The SUPS-J Series provides premium power protection for sensitive professional electronics. Featuring a pure sinewave output, it guarantees stability for servers, networking hardware, and critical computing systems. Integrated surge protection and automatic voltage regulation (AVR) defend against harmful power fluctuations.

## Technical Specifications

### Supported Applications

- Servers
- Networking Equipment
- Computers

Output Waveform	Pure Sinewave
Key Protection Features	Surge Protection, Automatic Voltage Regulation, Battery Backup, Data Line Protection

## Physical and Connectivity

### Design

Compact

Management Options	Remote management capabilities included
--------------------	-----------------------------------------
