

Single-Acting Hydraulic Cylinder

This single-acting hydraulic cylinder is designed for lifting and pushing applications. It features a compact, heavy-duty construction with a durable yellow finish and includes a high-pressure hydraulic fitting.

Overview

Industrial Hydraulic Power

This single-acting hydraulic cylinder is engineered for heavy-duty lifting and pushing applications in demanding environments. Its compact, robust construction makes it ideal for use in confined spaces where high force is required. Designed with portability and ease of installation in mind, it features integrated handles and a threaded collar for secure mounting.
