

Single Conductor Electrical Wire

This is a single-conductor electrical wire with white PVC insulation. The exposed end reveals a stranded copper conductor, making it suitable for low-voltage applications and internal wiring.

Product Overview

Versatile Single Conductor Wiring

This high-quality single-conductor electrical wire is designed for diverse low-voltage applications. Featuring a durable white PVC insulation jacket, it provides reliable protection for internal electronic wiring. The stranded copper core ensures excellent flexibility and consistent conductivity for your electrical assemblies.

Technical Specifications

Jacket Color

White

Conductor Type

Stranded Copper

Insulation Material

PVC

Typical Applications

Internal Electronic Wiring, Low-Voltage Systems, General Electrical Assembly
