

# Single Conductor THHN Building Wire

This single conductor THHN building wire is suitable for general purpose wiring applications. The copper conductor is insulated with abrasion, gasoline, and oil-resistant PVC insulation and a nylon jacket.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade THHN Building Wire

This high-performance single conductor THHN building wire is designed for general purpose wiring in commercial and industrial environments. Engineered with a stranded copper conductor and protected by abrasion-resistant PVC insulation with a nylon jacket, it ensures reliability in harsh conditions. It is fully compliant with the National Electrical Code for use in conduit and cable trays for services, feeders, and branch circuits.

## Technical Specifications

### Voltage Rating

**600 V**

Voltage Rating

### Operating Temperature

Environment	Max Temperature
Dry	90
Wet	75

### Insulation and Jacket

PVC Insulation, Nylon Jacket, Abrasion Resistant, Gasoline Resistant, Oil Resistant, Moisture Resistant

## Application Details

### Available Colors

- Black
- Red
- White
- Blue
- Green

### Recommended Usage

Commercial • Industrial • Conduit • Cable Trays • Feeders • Branch Circuits
