

Single Core PVC Insulated Electrical Wire

This is a single core electrical wire insulated with PVC. The wire consists of 7 strands and is rated for 300/500V.

Product Overview

High-Performance Single Core PVC Wire

This single core PVC insulated electrical wire is designed for reliable performance in household and light industrial applications. Manufactured to strict standards, it features a 7-strand conductor construction, ensuring flexibility and durability. With a rated voltage of 300/500V and a standard 100m length, this wire provides a consistent and safe solution for various electrical installations.

Technical Specifications

Rated Voltage

300 V

Lower Voltage Rating

500 V

Upper Voltage Rating

Conductor Structure	7 strands
Compliance Standard	JB/T8734.2-2016

Logistics & Packaging

Wire Type

BV 1mm² • Single Core • PVC Insulated

Standard Length	100 m
