

Single Cylinder 4-Stroke Diesel Engine

Single-cylinder, air-cooled, 4-stroke diesel engine featuring direct fuel injection, recoil start, and a horizontal shaft configuration. With a displacement around 406cc and a power output of approximately 9 horsepower, it is ideal for powering agricultural machinery, generators, and other industrial equipment.

Overview

Reliable Power Solution

This single cylinder, 4-stroke diesel engine is engineered for durability and consistent performance in demanding environments. Featuring an air-cooled design and direct fuel injection, it offers efficient operation for a wide range of industrial and agricultural machinery. With a horizontal shaft configuration and reliable recoil start, it is an ideal choice for powering generators, pumps, and other heavy-duty equipment.

Technical Specifications

Displacement	406 cc
Rated Speed	3600 RPM
Fuel Tank Capacity	5.5 L

Performance

Power Output

9 HP
Power

Design Features

Starting Method

Recoil Start

Key Features

Single Cylinder, 4-Stroke, Air-Cooled, Direct Fuel Injection, Horizontal Shaft

Applications

Suitable Applications

- Agricultural Machinery
- Power Generators
- Industrial Equipment
