

Single Cylinder 4-Stroke Gasoline Engine

This single-cylinder, 4-stroke, OHV gasoline engine is designed for various applications requiring reliable power. It features an overhead valve configuration for improved efficiency, a durable cast iron cylinder liner for extended engine life, and a recoil starting system for easy start-up.

Overview

High-Performance Gasoline Engine

This single cylinder, 4-stroke OHV gasoline engine is engineered for reliability and efficient power delivery across a wide range of applications, including generators, water pumps, and tillers. It features a durable cast iron cylinder liner for extended service life and a robust 5.5L fuel tank for prolonged operation. With a compact design and recoil starting system, this engine provides an optimal balance of performance and ease of use for demanding professional tasks.

Technical Specifications

Performance Metrics

7 hp Max Output	13.5 N.m Max Torque	212 cc Displacement
---------------------------	-------------------------------	-------------------------------

Engine Dimensions	70 x 55 mm (Bore x Stroke)
Compression Ratio	8.5
Rated Speed	3600 rpm

Logistics & Physical

Weight

Type	Weight (kg)
Gross Weight	16.5
Net Weight	15.5

Container Loading Capacity

- 20GP: 440 units
- 40HQ: 1056 units

Physical Dimensions

420 x 365 x 415 mm

Capacities

Fluid Capacities

5.5 L

Fuel Tank
