

Single-Cylinder 4-Stroke Gasoline Engine

This is a single-cylinder, air-cooled, 4-stroke gasoline engine. It features a recoil start system and overhead valve (OHV) technology.

Overview

High-Efficiency Power Solution

This single-cylinder, 4-stroke gasoline engine is engineered for versatility and reliability across various power equipment applications. Featuring advanced overhead valve (OHV) technology, it delivers optimized fuel efficiency and consistent performance. Its robust construction ensures durability for demanding tasks, making it an ideal choice for generators, water pumps, and tillers.

Technical Specifications

Technology

OHV (Overhead Valve) • 4-Stroke

Engine Type	Single-cylinder, 4-stroke
Cooling System	Air-cooled
Starting System	Recoil start

Performance Metrics

Power Output

8 HP

Rated Power

Applications

Compatible Equipment

- Generators
- Water pumps
- Tillers
- General power equipment
