

Single-Cylinder Air-Cooled 4-Stroke Gasoline Engine

This single-cylinder, air-cooled, 4-stroke gasoline engine is commonly used in generators, water pumps, and small construction equipment. It features an overhead valve (OHV) design for improved efficiency and a recoil starter for easy starting.

Overview

High-Efficiency Gasoline Engine

This single-cylinder, air-cooled, 4-stroke gasoline engine is engineered for reliable performance in demanding environments. Featuring an overhead valve (OHV) design, it offers improved fuel efficiency and operational longevity. It is a versatile power solution suitable for integration into generators, water pumps, and various small construction equipment.

Technical Specifications

Engine Type	Single-cylinder, 4-stroke, air-cooled
Valve Configuration	Overhead Valve (OHV)
Model Designation	170F

Features

Starting System
Recoil Starter

Included Components

- Air filter
- Fuel tank
- Muffler

Physical Attributes

Color Finish	Yellow
--------------	--------
