

Single Cylinder Aluminum Motorcycle Engine Cylinder Head

This is a cylinder head designed for small displacement engines, commonly found in motorcycles and ATVs. The cylinder head is made of cast aluminum and features cooling fins to dissipate heat.

Product Overview

Precision-Engineered Cylinder Head

This single-cylinder aluminum cylinder head is designed for high-performance four-stroke motorcycle and small ATV engines. Crafted from durable cast aluminum, it features integrated cooling fins to ensure optimal heat dissipation during operation. The component comes fully equipped with intake and exhaust ports, precision valve seats, and a dedicated spark plug mounting point, making it a reliable replacement or upgrade for small displacement engines.

Technical Specifications

Primary Applications

Motorcycle • ATV • Small Displacement Engine

Included Components

- Intake Ports
- Exhaust Ports
- Valve Seats
- Spark Plug Provision

Material	Cast Aluminum
Engine Compatibility	Single-Cylinder, Four-Stroke
Cooling Method	Air-Cooled (Integrated Fins)
