

Single-Cylinder Diesel Engine CG188F

This single-cylinder diesel engine is engineered for diverse industrial and agricultural applications. The engine features a direct injection system that enhances fuel efficiency and reduces emissions.

Overview

Reliable Single-Cylinder Power

The CG188F is a robust single-cylinder diesel engine engineered for versatility across industrial and agricultural sectors. Featuring a direct injection system, it offers enhanced fuel efficiency and reduced emissions while maintaining consistent performance. Its compact, lightweight design ensures ease of installation and mobility, making it an ideal power source for generators, water pumps, and rotary tillers.

Technical Specifications

Displacement	406 cc
Cooling System	Air Cooled
Safety Features	Low Oil Shutdown Protection, Direct Injection

Construction

Build Materials

- Cast iron cylinder liner
- Forged steel crankshaft

Applications

Typical Applications

Rotary Tillers • Water Pumps • Generators • Road Machinery

Performance

Performance Highlights

406 cc
