Product Overview

Reliable Power for Agricultural Applications

This single-cylinder diesel engine is engineered for demanding environments, making it an ideal power source for small agricultural machinery, water pumps, and portable generators. Featuring a robust cast iron cylinder block and head, it is designed for durability and ease of maintenance in remote locations. The four-stroke, air-cooled system ensures consistent performance where electricity is unavailable.

Technical Specifications

Construction Material

Cast Iron Cylinder Block • Cast Iron Cylinder Head

Engine Type	Single-cylinder, four-stroke
Cooling System	Air-cooled

Performance & Control

Engine Performance

4 stroke

Cycle

1 cyl

Cylinder Count

Speed Control	Mechanical governor
---------------	---------------------

Maintenance & Support

Maintenance

- Easy maintenance design
- Readily available spare parts
- Field-repairable

Applications

Typical Applications	Agricultural Machinery, Water Pumps, Generators, Remote Power
----------------------	---
