

Single-Cylinder Diesel Engine for Industrial and Agricultural Use

This is a robust and reliable single-cylinder diesel engine designed for a variety of industrial and agricultural applications. It features a direct injection system for efficient fuel combustion and optimal power output.

Overview

Robust Single-Cylinder Power

The FD178 is a reliable and durable single-cylinder diesel engine engineered for diverse industrial and agricultural applications. Featuring a direct injection system for efficient fuel combustion, this engine delivers optimal power output while maintaining a compact footprint. It is built to withstand demanding environments, making it an ideal choice for powering generators, water pumps, and various small machinery.

Technical Specifications

Cooling System	Forced air cooling
Fuel Type	Diesel
Injection System	Direct Injection

Features

Key Features

- High-capacity fuel tank
- Easy start mechanism
- Durable construction
- Compact design

Applications

Typical Applications	Generators, Water Pumps, Small Machinery, Industrial, Agricultural
----------------------	--
