

Single-Cylinder Four-Stroke Engine for Small Vehicles

This is a single-cylinder, four-stroke engine designed for small vehicles. It features a horizontally oriented cylinder with cooling fins, an electric starter motor, and a side-mounted carburetor.

Product Overview

Reliable Power for Small Vehicles

This single-cylinder, four-stroke engine is engineered for consistent performance in compact vehicle applications. Featuring a robust cast aluminum casing and a horizontally oriented cylinder design with integrated cooling fins, it balances durability with efficient heat management. Equipped with an electric starter and a side-mounted carburetor, this unit is designed for straightforward installation and reliable operation in diverse small-engine environments.

Technical Specifications

Cylinder Count	1
Stroke Type	Four-stroke
Cylinder Orientation	Horizontal
Casing Material	Cast Aluminum

Features & Components

Key Features	Electric Starter, Cooling Fins, Side-mounted Carburetor
--------------	---

Features & Compatibility

Intended Applications

- Motorcycles
- ATVs
- General Small Engine Applications
