

Single-Cylinder Four-Stroke Engine for Small Vehicles

This is a single-cylinder, four-stroke engine designed for small vehicles. It features an aluminum alloy block, electric starter, and side-mounted carburetor.

Overview

High-Performance Small Vehicle Engine

This single-cylinder, four-stroke engine is engineered specifically for small vehicles, offering a balance of power and efficiency. Constructed with an aluminum alloy block, it ensures lightweight durability and superior heat dissipation. Equipped with an electric starter and a side-mounted carburetor, this unit is an ideal choice for motorcycles, ATVs, and various recreational vehicle applications.

Technical Specifications

Engine Type	Single-cylinder, Four-stroke
Block Material	Aluminum Alloy
Cooling Method	Air-cooled (via cooling fins)
Starting System	Electric Starter

Compatibility

Suitable Applications	Motorcycles, ATVs, Recreational Vehicles
-----------------------	--

Key Features

Design Highlights

- Horizontally oriented cylinder
- Integrated cooling fins
- Side-mounted carburetor
- Aluminum alloy construction
