

Single-Cylinder Gasoline Engine

This single-cylinder gasoline engine powers small machinery and equipment. Its compact design makes it suitable for portable applications.

Overview

Compact Single-Cylinder Engine

This single-cylinder gasoline engine is engineered for portability and efficiency in small machinery applications. With a lightweight design of just 2.5kg, it is an ideal power source for handheld tools like brush cutters and trimmers. The unit features a reliable recoil starter and robust construction to ensure consistent performance in demanding operating environments.

Technical Specifications

Model Number	1PE32F
Displacement	22.5 ml
Net Weight	2.5 kg

Performance

Maximum Power Output

0.65 kW
Max Power

7500 r/min
Rated Speed

Features

Key Features	Recoil Starter, Compact Design, Lightweight, Portable
