

# Single-Cylinder Gasoline Engine

This single-cylinder, air-cooled gasoline engine is suitable for generators, water pumps, and small vehicles. It features a compact design and durable metal housing, ensuring reliable performance for light to medium-duty tasks.

## Overview

### Reliable Power Solution

This single-cylinder, air-cooled gasoline engine is engineered for versatility and consistent performance in various light to medium-duty applications. Designed with a compact footprint, it is an ideal power source for generators, water pumps, and small utility vehicles. The unit features a durable metal housing, a recoil starter system, and an efficient carburetor for reliable operation and straightforward maintenance.

## Technical Specifications

### Power Output

**7.5 HP**

Rated Power

### Starting System

Recoil Starter

### Engine Type

Single-cylinder, air-cooled, 4-stroke

## Design & Construction

### Core Components

- Cylinder Head
- Piston
- Connecting Rod
- Crankshaft
- Valve Train

### Key Features

Air-cooled, Compact Design, Durable Housing, Easy Maintenance
