

Single-Cylinder Gasoline Engine for Tillers

This single-cylinder gasoline engine is designed for tiller applications. It features durable construction and efficient combustion for reliable performance and is equipped with a recoil starter and a fuel tank suitable for extended operation.

Product Overview

Reliable Power for Tilling

This single-cylinder, 4-stroke gasoline engine is engineered specifically for tiller applications, offering a robust and efficient power solution. With forced air cooling and an OHV design, it ensures consistent performance and durability during demanding tilling operations. Its compact build and reliable recoil starter make it an ideal choice for integration into various agricultural machinery.

Performance Metrics

Max Output

2.8 HP

Max Output

Technical Specifications

Engine Type	Single Cylinder 4-stroke Forced air cooling OHV
Bore x Stroke	56x38 mm
Displacement	94 cc

Capacity & Consumption

Fuel Tank Capacity	1.6 L
Oil Capacity	0.37 L
Fuel Consumption	d450/kw-h
