

Single-Cylinder Two-Stroke Engine

This is a single-cylinder two-stroke engine designed for applications like motorcycles. It features a carburetor for fuel-air mixing and cooling fins for heat dissipation.

Overview

High-Performance Two-Stroke Engine

This single-cylinder two-stroke engine is engineered for reliability and efficient power delivery. Designed with air-cooling fins for optimal heat dissipation and a robust crankcase assembly, it is suitable for various light-duty power applications. Its simple, compact architecture ensures ease of maintenance and consistent performance in demanding environments.

Technical Specifications

Cooling System

Air-cooled

Engine Type

Single-cylinder, two-stroke

Fuel System

Carbureted

Construction

Design Features

- Integrated cooling fins
- Robust crankcase assembly
- Compact form factor
