

Single-Cylinder Water-Cooled Diesel Engine

This single-cylinder, water-cooled diesel engine is designed for diverse applications such as power generation and agricultural machinery. It features direct injection for efficient combustion and reliable performance.

Product Overview

Robust Single-Cylinder Power

The 190L is a high-performance, single-cylinder water-cooled diesel engine engineered for versatility in agricultural, power generation, and mobile applications. It utilizes direct injection technology to ensure efficient combustion and consistent power output. Built for demanding environments, this engine features premium materials including a cast iron block and forged steel crankshaft to ensure long-term durability and simplified maintenance.

Technical Specifications

Cooling System	Water-Cooled
Cylinder Count	1
Injection Type	Direct Injection

Materials and Components

Cylinder Block Material	Cast Iron
Crankshaft Material	Forged Steel
Cylinder Head Material	Aluminum Alloy

Accessories

Included Equipment	Air Cleaner, Fuel Filter
--------------------	--------------------------

Applications

Primary Applications

- Power Generation
- Agricultural Machinery
- Small Vehicles
